## NOTICE OF ALLOWABILITY

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or suggest all of the limitations of the claims including both, "an aspherical inferior engaging surface and an aspherical superior engaging surface." The term "aspherical" as used in the specification refers to a particular shape or curvature. Applicant uses the term "engaging surface" throughout the specification referring to the ring surface that engages the eye. Therefore, the limitation, "*aspherical* engaging surface," refers to the curvature of the ring engaging surface.

To further illustrate the meaning of "aspherical engaging surface," the only illustrated embodiment disclosed by applicant as having both "an aspherical inferior engaging surface and an aspherical superior engaging surface" is the embodiment of Figs. 8A-1 and 8A-2. This is the only embodiment that illustrates both the inferior and superior engaging surfaces as having a curved bevel, which is required for an *aspherical* surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
